

Policy Chart: Technology and Information Access

Equity Goal:

Increase equitable access to knowledge and resources for underserved communities

Equity Policy

Increase access, capacity, and knowledge to use technology in low-income communities and communities of color

Arts and Culture Strategies

- Partner with arts and culture organizations to create culturally relevant means through technology to engage public input from underrepresented communities.
- Increase technology access and knowledge for low-income communities and communities of color to tell their own narratives.
- Fund project proposals that are at the intersection of technology, art, and social justice.
- Employ youth of color to use media to create dialogue around equity and community planning.
